Summary

Frontend-focused full-stack developer who ships production interfaces end-to-end, from data model and REST API through the final pixel. Builds in React, Next.js, and Tailwind CSS, with the backend and database depth (Node.js, MySQL, MongoDB) to own a feature completely rather than hand off half of it. Currently leads development of a CRM-driven product platform as Head of Development, and has shipped several client and personal products from scratch to deployment.

Experience

Head of Development

MAVR - AI growth ecosystem for trainers, athletes & gym owners

Present

mavr.in

- Own the product end-to-end: designed the data model, REST APIs, and the React-based interface for a CRM dashboard used by gym owners to track trainer/athlete progress and business growth.
- Lead SEO-optimized site delivery and cloud deployment, working directly with design to keep the product visually and structurally consistent as it grows.

Freelance Web Developer

Independent

2025

- Ramlallaa.in: built and shipped a fully responsive construction-company site from scratch (HTML, CSS, JavaScript), owning requirements, UI, and deployment over a 2-month engagement.
- Vojon Rosik Restaurant: designed the visual identity and built the restaurant website (WordPress, Elementor) with menu, brand storytelling, and reservation flow in 15 days, handling hosting and deployment end-to-end.
- Krishnav: built and deployed a product-catalog site (krishnavv.netlify.app) for a handcrafted sacred-garments brand, curating product photography and wiring up a WhatsApp-based ordering flow per item.

Selected Projects

AK47 StreamX - Music Streaming App

Next.js, React, Tailwind CSS, Audio API

auria-melody.vercel.app

- Built a free, ad-free music streaming web app with curated mixes (Chill Vibes, Bollywood Hits, Hip-Hop, EDM, Focus Flow) that anyone can browse and play without creating an account.
- Added optional sign-in for cross-device sync, plus search, library, and rewards views as distinct product states within one app.

Nexas - Voice Command Layer for the Web (In Progress)

React, Voice Interfaces, RAG (planned)

nexas-ai-one.vercel.app

- Designing a local-first voice command layer that lets users trigger web actions, research, and memory recall by speaking naturally; frontend shipped, local LLM and automation backend planned next.

Nova.Ai (Supernova) - AI Image Generation

Next.js, TypeScript, Flux (Pixazo API)

supernova-image.vercel.app

- Built a no-login, prompt-to-image web app using the Flux model via the Pixazo API, with configurable aspect ratio, format, and safety settings, keeping the API key entirely server-side.

Portfolio Website

React, Next.js, Tailwind CSS

abir-kayal.vercel.app

- Designed and built a personal portfolio with motion-led interactions, a mobile-first responsive layout, and a reusable component system to showcase shipped product and client work.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, responsive & accessible UI

Full-stack / API: Node.js, Express.js, RESTful API design & integration, MVC architecture, OOP

Data: MySQL, MongoDB, Supabase, query optimization, database design

Tooling: Git, GitHub, Postman, unit/integration testing, Vercel, Netlify

AI/LLM: Retrieval-Augmented Generation (RAG), LLM integration, prompt engineering

Education

Maulana Abul Kalam Azad University of Technology (MAKAUT)

2023 - 2027 (Expected)

Bachelor of Computer Applications (BCA), 3rd Year - CGPA 7.3
